HISTORY OF WASATCH COUNTY

295

STRAWBERRY RESERVOIR

The dam and reservoir in Strawberry Valley were completed in 1912 at which time there were 8,600 acres underwater and about 45,500 acres in the area used for range lands. The reservoir was enlarged in 1973 when the Soldier Creek Dam was constructed. The existing Strawberry Dam and Indian Creek Dike were partially removed which merged the two reservoirs, increasing the total surface acres of Strawberry Reservoir to 17,160 acres at high water.

Besides providing an important source of water to a large part of Utah, it has become a valuable recreation spot. A large number of summer homes have been built in the area as well as a motel, a visitors center, and several marinas. Daniels Summit has also developed as a winter sports area.
